WE UNDERSTAND AND OFFER THE FULL VALUE CHAIN OF THE INDEX BUSINESS

- **OWNERSHIP**
You have full control, and you can manage your index
- **KNOW-HOW**
Our team members are experts from both – the index and the structured business
- **SCALABILITY**
We offer our clients access to local resources and industry-specific expertise
- **GLOBAL NETWORK**
Our local presence in key centres enables index development and servicing in any jurisdiction
- **TECHNOLOGY**
We run a multi-asset calculation engine for liquid assets and can tailor technical demands taking away operational risk & burden on your end
- **DERIVATIVES AND ALTERNATIVE ASSETS**
We cooperate with valuation service for "out-of-the-box" requests

Our Partners

LIXX has a large network of partners allowing us to find the most effective investment solution for our partners and clients

HOW IT WORKS

WHAT IS NEW?

INTRODUCTION TO THE INDEX METHODOLOGY:

We turn unstructured textual information into meaningful relationships across stocks & themes

Our new AI-driven indexes are the result of a meticulous analysis of vast textual data derived from diverse sources such as company reports, news, forums and vertical sites. This dynamic approach allows for identifying and capturing investible themes and link companies to these evolving trends or topics.

HOW IS IT DONE?

FinScience analytical process excels in identifying a broad spectrum of companies tied to various themes, even uncovering more nuanced connections.

At the core of this capability is FinScience's resilient data pipeline, supported by a dynamic data lake continually enriched with 1.5 million pieces of textual data gathered from 35,000 different sources daily such as mainstream as well as vertical news sites, blogs, forums, and more. The power resides in our adept data gathering, facilitating the acquisition of sector-specific and pertinent information for a multitude of micro and macro themes in the market.
